DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 4-16, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Balint in view of Examiner official notice.

Balint discloses substantially the invention as claimed. Balint does not disclose a deformation being a stake. However, it is a well known expedient to strike the end of a screw in order to core the bottom of the screw to prevent it to backing up.

In regard to claims 1, 11, and 16, J. Balint discloses in figure 2, a terminal assembly, comprising: a terminal base 3 having a bore 5 with an internal thread 6, a screw X (see attachment A, figure 2) having a shank 8 with opposite first and second ends and with an external thread Y (see attachment A, figure 2), and having a head 39 on a first end of a shank, and a deformation 35 in a portion of an external thread.

Art Unit: 2833

In regard to claim 4, J. Balint discloses in figure 2, a shank which is offset from a longitudinal axis.

In regard to claim 5, J. Balint discloses in figure 2, a portion of an external thread forming the deformation which has a reduced width between adjacent crests.

In regard to claims 6, and 12, J. Balint discloses in figure 5, a backing plate 4 which has a central aperture 7.

In regard to claims 7, and 13, J. Balint discloses in figure 2, a backing plate which comprises a depending tab 13, and a terminal base which comprises an opening 2.

In regard to claims 8, and 14, J. Balint discloses in figure 2, a backing plate which comprises depending first and second tabs on opposite side edges, and the terminal base which comprises first and second openings.

In regard to claims 9, and 15, J. Balint discloses in figure 2, a terminal base which comprises a contact 41 extending therefrom.

In regard to claim 10, J. Balint discloses in figure 4, an external thread which has an axial length sustaining greater than an axial length of an internal thread.

In regard to claim 18, J. Balint discloses in figure 4, a shank which is placed within a central aperture of a backing plate before being threaded into the bore.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 11, 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
